

QUALITY • DILIGENCE • ASSURANCE

Capability Statement

About Us

At **LRS** we understand that navigating the world of electrical & instrumentation contracting & compliance can be a very time-consuming task, often involving multiple contractors, creating a huge amount of planning, organising, time pressures and becoming extremely costly to organisations.

Founded in 2021, we opened with an aim to streamline this process, by offering a one stop solution to all your electrical and instrumentation requirements. From initial planning and design, right through to reaping the benefits of a safe, efficient plant. We are a family-owned business that delivers on what we promise.

We are not only there to perform the work - we build relationships & trust, and we consistently deliver the highest results.

LRS – QUALITY • DILIGENCE • ASSURANCE
